

## **Laser Operatory Attendance Policy**

Our office policy is for parents to wait in the consultation room while the frenectomy procedure is being performed by Dr. Yazdi and staff. During medical procedures, it is understood that family members are not present in the operatory as to not contaminate the area or disturb the proceedings. Likewise, dentists need their operatory clear of distractions so they can concentrate on performing the procedure giving their 100% attention to quality and safety. Doing so is further in accordance with latest *Laser Hazards Control Measures and Safety Programs*.

We appreciate the breastfeeding mother relax outside of the operatory avoiding unnecessary stress. Likewise the supportive father/partner should relax as well and concentrate on reviewing the aftercare instructions and providing strong emotional support to each other.

**Only trained necessary personnel are allowed in the operatory.**

Thank you for your cooperation,

Dr. Shervin K. Yazdi
